

# TSM<sup>®</sup> Micro Boost "SOIL"

EDTA Micronutrient Formulation with TSM<sup>®</sup> Soil Surfactant

## GENERAL RECOMMENDATIONS

Apply at a rate of 1 quart per acre broadcast or band application. Use 1 pint per acre as a germinator. TSM<sup>®</sup> MICRO BOOST "SOIL" will provide chelated micronutrients to the soil and improve soil structure, tilth and water permeability.

It is recommended that a sulfur product be added such as liquid 12-0-0-26, or ATS (Ammonium Thiosulfate). Most drift reducing products are a sulfate based product and will also work as a sulfate source.

Optimum rate of application will vary between fields, depending on soil pH and organic matter content. For best results, follow soil test or plant analysis recommendation.

**WARNING:** Some crops may be injured by applications of Boron.

## MIXING INSTRUCTIONS

Put 2/3 of carrier solution in tank and add other chemicals, if any. Fill balance of tank with carrier solution. Add correct amount of TSM<sup>®</sup> MICRO BOOST "SOIL".

**Agitate adequately to mix.**

### CAUTION:

Check compatibility with chemical mixtures.

Warranty: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.

## MINIMUM GUARANTEED ANALYSIS 0-0-0

Boron (B).....	0.25%
0.25% Water Soluble Boron	
Copper (Cu).....	0.50%
0.50% Water Soluble Copper	
Iron (Fe).....	0.25%
0.25% Water Soluble Iron	
Manganese (Mn).....	2.00%
